

English with a Native Speaker for Our Cadets at the Pilot School of LLC “Training Center”!

2025 17 March

Today, our cadets had a special English lesson – a native speaker conducted the class! We worked on aviation terminology, practiced communication in the cockpit, and learned to interact confidently in English in a professional environment.

During the lesson, students:

- practiced radio phraseology and standard commands;
- improved their listening comprehension skills in English.

Such lessons help our cadets develop language skills in real aviation contexts, which is crucial for future pilots.
